

## My school –my life

Extracts:

School - important part of our life. We spend here about eight hours every day. It's the best place to meet new friends, to learn different things and have fun, but the most important goal is to prepare us for life. This place wants to form us into young, clever and intelligent people. That is why education is so important. Today the education is viewed as the best key to successful life. Each of us was born in different social conditions. But I think everybody wants to be successful in their life. School is the place where we learn how to get it. Every morning most of us get out of bed and think "oh, dear school again"! But we should wake up and think about the other side of school. About our friends and about our unforgettable memories we leave school with.

I try to enjoy every single day here, because everybody who ended school said: "It was the best part of my life". When I'm older I want to return to the first class and live it again. We should enjoy it as much as we can. Learn everything what is offered because there will not be another opportunity to live it again.

I like it here and I can't imagine my life without it. It would be so boring!

The motto of our school says: "If you want to move the world, you have to move yourself first", and it is the biggest truth I have ever heard.

SO START WITH EDUCATION.....

My school is Sport Secondary School in Košice and sport is the first and most important here. We have a lot of physical activities for example football, handball, basketball, gymnastic, water polo, wrestling, weightlifting, tennis or fitness..... Now I really can't remember all of them.

We have training every day. Our students are divided into two groups. The first group has training every morning from half past seven to half past nine, then they go to school and after school back to the training. The second group has classes first and then training and in the afternoon they go to school again...

I can say that our teachers are great. They are very friendly to us. My classmates and schoolmates are friendly too.

When I started to play handball for a club my coach persuaded me to join Sport Secondary School. I came here from the seventh class of primary school, I met new friends and they were very friendly. I have been here for four years. I am very happy because I can do sport here.....

I really like English lessons mainly conversations. I'm so excited to study at this school, because I can do sport and learn at the same time.

Studying here is very exciting for me and I like this school at everything. Teachers are very helpful. Most of all I like English lessons with my English teacher who always helps me if I don't know anything. During English lessons I always learn a lot of new words which I can use later while chatting with lots of my friends all over the world. The school really helps me to communicate with other nationalities and I am grateful for it.

A lot of students say every day: "The hell I must go to school" yes me too. But I know that in my classroom there is a lot of fun. Teenagers don't like going to school, they think that their life is just a party but it isn't. When they are older they will understand. No education- no work, no work- no money, no money- no life.

I love my school because I can do all amazing things like study and do athletics at the same time.

School, friends and athletics have a special place in my heart. At this school I met a lot of awesome people, these people are full of happiness and energy. We spend our time at trainings meanwhile teenagers at classic school spend their time in pubs or on drugs.

Many people say: "Sport School is easy because you do not care about study, it is all about the sports". They are wrong. We study as much as at other schools, if not more. And do not forget that we have almost no free time to study obviously because of training.....

This school gave me a lot. I learned discipline and I gained a good figure because of trainings.
